Vendor: Microsoft   Exam Code: 70-640   Exam Name: TS: Windows Server 2008 Active Directory, Configuring   Version: 14.91 QUESTION 461   Your network contains an Active Directory forest. The forest contains domain controllers that run Windows Server 2008 R2. The functional level of the forest is Windows Server 2003. The functional level of the domain is Windows Server 2008.   From a domain controller, you need to perform an authoritative restore of an organizational unit (OU). What should you do first? A.   Raise the functional level of the forest   B.   Modify the tombstone lifetime of the forest.   C.   Restore the system state.   D.   Raise the functional level of the domain. Answer: C   QUESTION 462   Your network contains an Active Directory forest. The forest contains two domains named contoso.com and woodgrovebank.com.   You have a custom attribute named Attribute 1 in Active Directory. Attribute 1 is associated to User objects.   You need to ensure that Attribute1 is included in the global catalog.   What should you do? A.   From the Active Directory Schema snap-in, modify the properties of the Attribute 1 attributeSchema object.   B.   In Active Directory Users and Computers, configure the permissions on the Attribute 1 attribute for User objects.   C.   From the Active Directory Schema snap-in, modify the properties of the User classSchema object.   D.   In Active Directory Sites and Services, configure the Global Catalog settings for all domain controllers in   the forest. Answer: A   QUESTION 463   Your network contains a server named Server1. Server1 runs Windows Server 2008 R2 and has the Active Directory Lightweight Directory Services (AD LDS) role installed. Server1 hosts two AD LDS instances named Instance1 and Instance2.   You need to remove Instance2 from Server1 without affecting Instance1.   Which tool should you use? A.   NTDSUtil   B.   Dsdbutil   C.   Programs and Features in the Control Panel   D.   Server Manager Answer: C   QUESTION 464   Your network contains an Active Directory domain. All domain controllers run Windows Server 2008 R2.   You need to compact the Active Directory database.   What should you do? A.   Run the Get-ADForest cmdlet.   B.   Configure subscriptions from Event Viewer.   C.   Run the eventcreate.exe command.   D.   Configure the Active Directory Diagnostics Data Collector Set (OCS). E.   Create a Data Collector Set (DCS).   F.   Run the repadmin.exe command. G.   Run the ntdsutil.exe command.   H.   Run the dsquery.exe command. I.   Run the dsamain.exe command.   J.   Create custom views from Event Viewer. Answer: G   QUESTION 465   Your network contains an Active Directory domain. All domain controllers run Windows Server 2008 R2.   You need to collect all of the Directory Services events from all of the domain controllers and store the events in a single central computer.   What should you do? A.   Run the ntdsutil.exe command. B.   Run the repodmin.exe command.   C.   Run the Get-ADForest cmdlet. D.   Run the dsamain.exe command.   E.   Create custom views from Event Viewer. F.   Run the dsquery.exe command.   G.   Configure the Active Directory Diagnostics Data Collector Set (DCS),   H.   Configure subscriptions from Event Viewer.   I.   Run the eventcreate.exe command.   J.   Create a Data Collector Set (DCS). Answer: H   QUESTION 466   Your network contains an Active Directory domain. All domain controllers run Windows Server 2008 R2. You need to receive a notification when more than 100 Active Directory objects are deleted per second.   What should you do? A.   Create custom views from Event Viewer.   B.   Run the Get-ADForest cmdlet.   C.   Run the ntdsutil.exe command.   D.   Configure the Active Directory Diagnostics Data Collector Set (DCS).   E.   Create a Data Collector Set (DCS).   F.   Run the dsamain.exe command. G.   Run the dsquery.exe command.   H.   Run the repadmin.exe command. I.   Configure subscriptions from Event Viewer.   J.   Run the eventcreate.exe command. Answer: E   QUESTION 467   Your network contains an Active Directory domain. All domain controllers run Windows Server 2008 R2.   You need to create a snapshot of Active Directory.   What should you do? A.   Run the dsquery.exe command.   B.   Run the dsamain.exe command.   C.   Create custom views from Event Viewer.   D.   Configure subscriptions from Event Viewer.   E.   Create a Data Collector Set (DCS).   F.   Configure the Active Directory Diagnostics Data Collector Set (DCS).   G.   Run the repadmin.exe command.   H.   Run the ntdsutil.exe command. I.   Run the Get-ADForest cmdlet.   J.   Run the eventcreate.exe command. Answer: H   QUESTION 468   Your network contains an Active Directory domain. All domain controllers run Windows Server 2008 R2.

You mount an Active Directory snapshot.   You need to ensure that you can query the snapshot by using LDAP.   What should you do? A.   Run the dsamain.exe command.   B.   Create custom views from Event Viewer.   C.   Run the ntdsutil.exe command.   D.   Configure subscriptions from Event Viewer.   E.   Run the Get-ADForest cmdlet.   F.   Create a Data Collector Set (DCS).   G.   Run the eventcreate.exe command.   H.   Configure the Active Directory Diagnostics Data Collector Set (DCS).   I.   Run the repadmin.exe command.   J.   Run the dsquery.exe command. Answer: A   QUESTION 469   Domains provide which of the following functions? A.   Creating logical boundaries   B.   Easing the administration of users, groups, computers, and other objects   C.   Providing a central database of network objects D.   All of the above Answer: D   QUESTION 470   You are the administrator for a large organization with multiple remote sites. Your supervisor security. What type of server can you implement to ease their would like to have remote users log in locally to their own site, but he is nervous about concerns? A.   Domain controller B.   Global Catalog   C.   Read-only domain controller   D.   Universal Group Membership Caching Server Answer: C If you want to pass Microsoft 70-640 exam successfully, donot missing to read latest lead2pass Microsoft 70-640 dumps.   If you can master all lead2pass questions you will able to pass 100% guaranteed. http://www.lead2pass.com/70-640.html
