

Free Lead2pass 70-412 PDF and VCE Dumps — 100 Percent Pass Guarantee (121-130)

Passing Microsoft 70-412 exam questions is guaranteed with Lead2pass. Lead2pass provides a great deal of Microsoft 70-412 preparation resources mend to step up your career with the endorsement of technical proficiency. The earlier you use Lead2pass products, the quicker you pass you 70-412 exam.

QUESTION 121 you are employee as a network administrator at abc.com. ABC.com has an active directory domain named ABC.com All servers on the abc.com network have Windows Server 2012 R2 installed and all workstations have windows 8 enterprise installed. ABC.com has established a remote Active directory site that only host workstations.The Computer accounts for these workstations have been placed in an organizational unit (OU),named ABCADRemote,which has a group policy object(GPO) associated with it. You are in the process of configuration Branchcace for the remote Active directory site. You have Already turned Branchcache on. Which of the following actions should you take next?
A. You Should consider having the set Branchcache HostedServer Cache mode setting configured
B. You Should consider having the set Branchcache Hostedclient Cache mode setting configured
C. You Should consider having the set Branchcache distributed cache mode setting configured
D. You should consider having the set BranchCache disabled cache mode settings configured
Answer: C

QUESTION 122 You are employed as a network administrator at ABC.com. ABC.com has an active directory domain named ABC.com. ALL servers on the ABC.com network have Windows Server 2012 R2. ABC.com has a server,named server 1, which runs the windows deployment services server role. You make use of windows server backup to back up server 1. Subsequent to a disk array on server 1 becoming corrupt,you swap the disk array with new hardware. You now need to recover server1 in the shortest time conceivable. Which of the following actions should you take?
A. you should consider making use of the Windows Server 2012 R2 installation media to start server1
B. you should consider restoring server1 from a snapshot backup
C. you should consider restoring server 1 from an incremental backup
D. you should consider restoring server 1 from a differential backup
Answer: A

QUESTION 123 You are employed as a senior network administrator at ABC.com. ABC.com has an active directory domain named ABC.com. all servers on the abc.com network windows server2012 installed. You are currently running a training exercise for junior network administrators. You are discussing the PKISync.ps1 tool. Which of the following is true with regards to The PKISync.ps1?
A. it adds a certificate template to the CA
B. it assists administrators in diagnosing replication problems between windows domain controllers
C. it is used to display information about the digital certificates that are installed on a directAccess client,DirectAcces server,or intranet resource
D. it copies objects in the source forest to the target forest.
Answer: D

QUESTION 124 You are employed as a network administrator ABC.com. ABC.com has an active directory domain named ABC.com. All servers on the ABC.com network have Windows Server 2012 R2 installed. ABC.com has a server named server1 which is configured as a DHCP server. You have created a superscope on server1. Which of the following describes reason for creating a superscope?(choose all that apply.)
A. To support DHCP clients on a single physical network segment where multiple logical ip networks are used.
B. To allow for the sending of network traffic to a group of endpoints destination hosts.
C. To support remote DHCP clients located on the far side of DHCP and BOOTP relay agents.
D. To provide fault tolerance
Answer: AC

QUESTION 125 You are employed as a network administrator at ABC.com. ABC.com has an active directory domain named ABC.com all servers including domain controllers on the ABC.com network have Windows Server 2012 R2 installed. ABC.com has its headquarters in London and an office in paris. The London Office has a domain controller named server1,which is configured as a writeable domain controller that servers as a Global catalog server and a DNS server. Server1 is configured to host an Active Directory-integrated zone for ABC.com The Paris office has a Read-Only domain controller (RODC) named server2 which servers as a Global catalog server. After installing the DNS server role on server2, you want to make sure that the ABC.com zone is replicated to server2 via active directory replication. Which of the following actions should you take?
A. You should consider making use of Active Directory Sites and Services to Configured replication
B. You should consider making use of replmon.exe to configure replication.
C. You should consider making use of repadmin.exe to configure replication
D. You should consider making use of Active Directory Schema To configure replication
Answer: A

QUESTION 126 You are employed as a network administrator at ABC.com. ABC.com has an Active Directory domain named. ABC.com all servers on the ABC.com network have Windows Server 2012 R2. You are running a training exercise for junior

network administrators. You are currently discussing DHCP failover architecture. You have informed the trainees that DHCP servers can be deployed as fail over partners in either hot standby mode or load sharing mode. Which of the following is TRUE with regards to hot standby mode? (Choose all that apply) A. It is when two servers function in a fail over relationship where an active server is responsible for leasing IP address and configuration data to all clients in a scope or subnet B. It is when two servers in a fail over relationship server IP addresses and options to clients on a given subnet at the same time C. It is best suited to deployments where a data center server acts as a standby backup server to a server at a remote site D. It is best suited deployments where both servers in a fail over relationship are located at the same physical site Answer: AC Explanation:

<http://blogs.technet.com/b/teamdhcp/archive/2012/09/03/dhcp-failover-hot-standby-mode.aspx> QUESTION 127 You are employed as a network administrator at ABC.com. ABC.com has an Active directory domain named ABC.com all servers on the ABC.com network have Windows Server 2012 R2. The ABC.com domain has two Active Directory sites configured. You want to make use of change notification configure replication between these Active Directory Sites. You have opened DEFAULTIPSITELINK Properties to configure the necessary attribute. Which of the following is the attribute that needs to be configured?

A. The revision attribute B. The Options attribute C. The schedule attribute D. The proxyAddresses attribute Answer: B QUESTION 128

You are employed as a network administrator at ABC.com. ABC.com has an Active Directory domain named ABC.com all servers on the ABC.com network have Windows Server 2012 R2 installed. ABC.com has a server named SERVER1 which has been configured to run the HYPER-V server role. SERVER1 is configured to host multiple virtual machines. When ABC.com acquires a server with a better hardware configuration to SERVER1 you are instructed to relocate the virtual machines to the new server with as little interruptions as possible. Which of the following actions should you take? (Choose all that apply.) A. You should consider exporting the virtual machines from Server1. B. You should consider running a snapshot backup of the SERVER1. C. You should consider importing the virtual machine from Server1 to the new server. D. You should consider restoring the snapshot backup on the hard drives of the new server. Answer: AC

QUESTION 129 You are employed as a network administrator at contoso.com. Contoso.com has in an Active Directory domain named contoso.com. All Servers on the contoso.com network have Windows Server 2012 R2 installed. A contoso.com server, named Server1, hosts the Active Directory Certificate Services Server role and utilizes a hardware security module (HSM) to safeguard its private key. You have been instructed to backup the Active Directory Certificate Services (ADCS) database, log files, and private key regularly. You should not use a utility supplied by the hardware security module (HSM) creator. Which of the following actions should you take? A. You should consider scheduling an incremental backup B. You should consider making use of the certutil.exe command. C. You should consider scheduling a differential backup D. You should consider scheduling a copy backup Answer: B Explanation: A. ADCS needs to be backup up using certutil B. -Backup, -backupdb, -backupKey: you can use Certutil.exe to dump and display certification authority (CA) configuration information, configure Certificate Services, backup and restore CA components, and verify certificates, key pairs, and certificate chains. C. ADCS needs to be backup up using certutil D. ADCS needs to be backup up using certutil

[directorycertificate-services-adcs.aspx](http://blogs.technet.com/b/pki/archive/2010/04/20/disaster-recovery-procedures-for-theactive-directorycertificate-services-adcs.aspx) QUESTION 130 You are employed as a senior network administrator at contoso.com. contoso.com has an active directory domain named contoso.com. All servers on the contoso.com network have Windows Server 2012 R2 installed. You are currently running at training exercise for junior network administrators. You are discussing the DNSSEC NRPT rule properly. Which of the following describes the purpose of this rule property? A. It is used to indicate the namespace to which the policy applies. B. It is used to indicate whether the DNS client should check for DNSSEC validation in the response. C. It is used to indicate DNSSEC must be used to protect DNS traffic for queries belonging to the namespace. D. It is used to whether DNS connections over DNSSEC will use encryption Answer: B Why to choose Lead2pass: User Friendly Test Engine; Well Formatted, PDFs and Exam Software; Progressive: DragDrops and HotSpots; Progressive: Amazing Simulations Environment Great Scenario of Questions & Answers; Over 3500+ Free Demo Available; Up to 90 Days Free Updates; 7/30 Customer Support a CLICK away. <http://www.lead2pass.com/70-412.html>
