Free Lead2pass 70-412 PDF and VCE Dumps — 100 Percent Pass Guarantee (131-140)

 Are you interested in successfully completing the Microsoft 70-412 certification then start to earning the high salary ? Lead2pass has leading edge developed test questions that will ensure you pass your exams! QUESTION 131   You are employed as a network administrator at contoso.com.   Contoso.com has an active directory domain named contoso.com.   All servers on the contoso.com network have Windows Server 2012 R2 installed.   Contoso.com has a server named server1,which is configured as a file server. You have been instructed to enabled a feature that discovers and eradicates duplication within data without compromising its reliability or accuracy.   Which of the following actions should you take?A.   You should consider having the Data Deduplication feature enabled.   B.   You should consider having the Storage Spaces feature enabled. C.   You should consider having the Storage Management feature enabled.   D.   You should consider having the folder redirection feature enabled. Answer: A QUESTION 132   You are employed as a network administrator at contoso.com.   contoso.com has a single Active Directory domain named contoso.com.   All servers on the Contoso.com network have Windows Server 2012 R2 installed.   Contoso.com has two servers,named server1 and server2 which are configured in a two-node fail over cluster.   You are currently configuration the quorum settings for the cluster.   You want to make use of a quorum mode that allows each node to vote if it is available and in communication.   Which of the following is the mode you should use? A.   Node Majority   B.   Node and Disk Majority C.   Node and File Share Majority   D.   No Majority:Disk Only Answer: A QUESTION 133   You are employed as a network administrator at contoso.com.   Contoso.com has a single Active Directory domain named contoso.com.   All servers on the contoso.com network have Windows Server 2012 R2 installed.   You are preparing to install a third-party application on a contoso.com server,named SERVER1.   You find that the application is unable to install completely due to its driver not being digitally signed.   You want to make sure that the application can be installed succesfully.   Which of the following actions should you take_? A.   You should consider downloading a signed driver   B.   You should consider having SERVER1 is restored to an earlier date C.   You should consider making use of the Disable Driver Signature Enforcement option from the Advanced Boot Option.   D.   You should consider restarting SERVER1 in safe Mode Answer: C QUESTION 134 You are employed as a senior network administrator at contoso.com.   Contoso.com has a single Active Directory Domain named contoso.com.   All servers on the contoso.com network have Windows Server 2012 R2 installed.   You are running a training exercise for junior network administrator.   You are currently discussing the Dnslint.exe tool.   Which of the following should this tool be used for ? (Choose all that apply) A.   To help diagnose common DNS name resolution issues B.   For developing scripts for configuring a DNS server   C.   To administer the DNS server Service.   D.   To look for specific DNS record set and sure that they are consistent across multiple DNS servers.   E.   To verify that DNS records used specifially for Active Directory replication are correct F.   To Create and delete zones and resource records. Answer: ADE QUESTION 135   You work as an administrator at contoso.com.   Contoso.com network consists of a single domain named contoso.com.   All servers on the contoso.com network have Windows Server 2012 R2 installed. Contoso.com has   a server, named SERVER1,which has the AD DS, DHCP and DNS server roles installed.   Contoso.com also has a server named SERVER2,which has the DHCP and Remote Access Server Role installed.   You have configured a server,which has the File and Storage Services Server role installed.to automatically acquire an IP address. The server is named Server3   You then create a filter on SERVER1.   Which of the following is a reason for this configuration? A.   To make sure that SERVER1 issues Server3 an IP address. B.   To make sure that SERVER1 does not issue SERVER3 an IP address   C.   To make sure that SERVER3 acquires a constant IP address from SERVER2 only.   D.   To make sure that SERVER3 is configured with a static IP address Answer: B   Explanation: A. MAC Address Filtering allows the ability to Deny a MAC addresses to be issued a IP from the DHCP server   B. Deny Filter would not allow SERVER1 to issue SERVER3 an IP   C. A DHCP Reservation on SERVER2 would be needed for a constant IP   D. QUESTION: states it   is configure to automatically acquire IP   http://technet.microsoft.com/en-us/library/cc779507(v=ws.10).aspx http://technet.microsoft.com/en-us/library/ee941155(v=ws.10).aspx QUESTION 136   You are employed as a network administrator at ABC.com.   ABC.com has an Active Directory domain named ABC.com.   All servers on the ABC.com network have Windows Server 2012 R2 installed.   You have been instructed to configure a custom Windows Recovery Environmen(Windows RE) image that should allow for a drive is mapped automatically to a network share in the event that a server

is started using the image.   Which of the following actions should you take? A.   You should consider configuring the startnet.cmd in the image   B.   You should consider configuring the startup.exe command included in the image.   C.   You should consider configuring the ntdsutil command included in the image D.   You should consider configuring the certutil.exe command included in the image Answer: A QUESTION 137   You are employed as a senior network administrator at ABC.com.   ABC.com has an Active Directory domain named ABC.com.   All servers on the ABC.com network have Windows Server 2012 R2 installed.   You are currently running a training exercise for junior network administrators.   You are discussing the endpoint types supported by Active Directory Federation Services(AD FS) Which of the following are supported types?(Choose all that apply) A.   SAML WebSSO B.   Anonymous   C.   WS-Federation Passive   D.   Client Certicate   E.   WS-Trust Answer: ACE   Explanation:

http://technet.microsoft.com/en-us/library/adfs2-help-endpoints(v=ws.10).aspx   QUESTION 138   You are employed as a senior network administrator at ABC.com.   ABC.com has an Active Directory domain named ABC.com.   All servers on the ABC.com network have Windows Server 2012 R2 installed.   The ABC.com domain has an Active Directory site configured in London,and an Active Directory site in New york.   You have been instructed to make sure that the synchronization of account lockout data happens quicker. A.   You should consider editing the options attribute from WANLINK properties B.   You should consider editing the options attribute from LANLIK properties   C.   You should consider editing the options attribute from the DEFAULTSITELINK properties   D.   You should consider editing the proxyAddressess attribute from the DEFAULTIPSITELINK properties. Answer: C QUESTION 139   You are employed as a senior network administrator at ABC.com.   ABC.com has an Active Directory domain named ABC.com.   All servers on the ABC.com network have Windows Server 2012 R2 installed.   ABC.com has two servers,named SERVER1 and SERVER2 which are configured in a two-node failover cluster. Server1 includes a folder,named ABCAppData,which is configured as a Distributed File System (DFS) name space folder target. After configuring another two nodes in the failover cluster, you are instructed to make sure that access to ABC AppData is highly available.   You also have to make sure that application data is replicated to ABCAppData via DFS replication.   Which following actions should you take ? A.   You should consider configuring a scale-out File Server   B.   You should consider configuring the replication settings for the cluster   C.   You should consider configuring a file server for general use   D.   You should consider configuring the Quorum settings Answer: A QUESTION 140   Your network contains an Active Directory domain named contoso.com.   The domain contains a server named Server1 that runs Windows Server 2012 R2 and has the DHCP Server server role installed.   You need to create an IPv6 scope on Server1. The scope must use an address space that is reserved for private networks. The addresses must be routable.   Which IPV6 scope prefix should you use? A.   FF00:: B.   2001::   C.   FD00:123:4567::   D.   FE80:: Answer: C Explanation: Prefixes in the fd00::/8 range have similar properties as those of the IPv4 private address ranges: * They are not allocated by an address registry and may be used in networks by anyone without outside involvement.   * They are not guaranteed to be globally unique.   * Reverse Domain Name System (DNS) entries (under ip6.arpa) for fd00::/8 ULAs cannot be   delegated in the global DNS.   As fd00::/8 ULAs are not meant to be routed outside their administrative domain (site or organization), administrators of interconnecting networks normally do not need to worry about the uniqueness of ULA prefixes. Why to choose Lead2pass: User Friendly Test Engine;   Well Formatted, PDFs and Exam Software;   Progressive: DragDrops and HotSpots;   Progressive:Amazing Simulations EnvironmentGreat Scenario of Questions & Answers;   Over 3500+ Free Demo Available;   Up to 90 Days Free Updates;   7/30 Customer Support a CLICK away. http://www.lead2pass.com/70-412.html
