

[Full Version Free Lead2pass 70-744 PDF Guarantee 100% Get 70-744 Certification (1-10)]

2017 March **Microsoft** Official New Released **70-744** Q&As in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! Lead2pass is now offering Lead2pass 70-744 dumps PDF and Test Engine with 100% passing guarantee. Buy Lead2pass 70-744 PDF and pass your exam easily. If you want real exam simulation then buy test engine and install on your pc for preparation.

Following questions and answers are all new published by **Microsoft** Official Exam Center: <http://www.lead2pass.com/70-744.html>

QUESTION 1 Note: This question is part of a series of question that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is Independent of the other questions in this series.

Information and details provided in a question apply only to that question. Your network contains an Active Directory domain named contoso.com. The domain contains a file server named Server1 that runs Windows Server 2016. Server1 has a volume named Volume1. Dynamic Access Control is configured. A resource property named Property1 was created in the domain. You need to ensure that Property1 is set to a value of Big for all of the files in Volume1 that are larger than 10 MB. Which tool should you use? A. File Explorer B. Shared Folders C. Server Manager D. Disk Management E. Storage Explorer F. Computer Management G. System Configuration H. File Server Resource Manager (FSRM) Answer: F

QUESTION 2 Note: This question is part of a series of questions that present the same scenario. Each question In the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to It. As a result, these questions will not appear in the review screen. Your network contains an Active Directory forest named contoso.com. All servers run Windows Server 2016. The forest contains 2,000 client computers that run Windows 10. All client computers are deployed (rom a customized Windows image. You need to deploy 10 Pnvilged Access Workstations (PAWs). The solution must ensure that administrators can access several client applications used by all users. Solution: You deploy 10 physical computers and configure each wie as a virtualization host. You deploy the operating system on each host by using the customized Windows image. On each host you create a guest virtual machine and configure the virtual machine as a PAW. Does this meet the goal? A. Yes B. No Answer: B

QUESTION 3 Your network contains an Active Directory forest named contoso.com. The forest functional level is Windows Server 2012. All servers run Windows Server 2016. You create a new bastion forest named admin.contoso.com. The forest functional level of admin.contoso.com is Windows Server 2012 R2. You need to implement a Privileged Access Management (PAM) solution. Which two actions should you perform? Each correct answer presents part of the solution. A. Raise the forest functional level of admm.contoso.com. B. Deploy Microsoft Identify Management (MIM) 2016 to admin.contoso.com. C. Configure contoso.com to trust admin.contoso.com. D. Deploy Microsoft Identity Management (MIM) 2016 to contoso.com. E. Raise the forest functional level of contoso.com. F. Configure admin.contoso.com to trust contoso.com. Answer: CF

QUESTION 4 Your network contains an Active Directory domain named conioso.com. The domain contains 1,000 client computers that run Windows 8.1 and 1,000 client computers that run Windows 10. You deploy a Windows Server Update Services (WSUS) server. You create a computer group tor each organizational unit (OU) that contains client computers. You configure all of the client computers to receive updates from WSUS. You discover that all of the client computers appear m the Unassigned Computers computer group in the Update Services console. You need to ensure that the client computers are added automatically to the computer group that corresponds to the location of the computer account in Active Directory. Which two actions should you perform? Each correct answer presents part of the solution. A. From Group Policy objects (GPOs), configure the Enable client-side targeting setting. B. From the Update Services console, configure the Computers option. C. From Active Directory Users and Computers, create a domain local distribution group for each WSUS computer group. D. From Active Directory Users and Computers, modify the flags atnbutne of each OU. E. From the Update Services console, run the WSUS Server Configuration Wizard. Answer: AB

QUESTION 5 Note: This question Is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is Independent of the other questions in this series. Information and details provided in a question apply only to that question. Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016. Server1 has a shared folder named Share1. You need to encrypt the contents of Share1. Which tool should you use? A. File

Explorer B. #160; #160; #160; Shared Folders C. #160; #160; #160; Server Manager D. #160; #160; #160; Disk Management E. #160; #160; #160; Storage Explorer F. #160; #160; #160; Computer Management G. #160; #160; #160; System Configuration H. #160; #160; #160; File Server Resource Manager (FSRM) Answer: H

QUESTION 6 Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. Start of repeated scenario Your network contains an Active Directory domain named contoso.com. The functional level of the forest and the domain is Windows Server 2008 R2. The domain contains the servers configured as shown in the following table. #160; All servers run Windows Server 2016. All client computers run Windows 10. You have an organizational unit (OU) named Marketing that contains the computers in the marketing department. You have an OU named Finance that contains the computers in the finance department. You have an OU named AppServers that contains application servers. A Group Policy object (GPO) named GP1 is linked to the Marketing OU. A GPO named GP2 is linked to the AppServers OU. You install Windows Defender on Nano1. End of repeated scenario You need to ensure that you can deploy a shielded virtual machine to Server4. Which server role should you deploy? A. #160; #160; #160; Hyper-V

B. #160; #160; #160; Device Health Attestation C. #160; #160; #160; Network Controller D. #160; #160; #160; Host Guardian Service Answer: A QUESTION 7 Your network contains an Active Directory domain named contoso.com. The domain contains four servers. The servers are configured as shown in the following table. #160; You need to manage FS1 and FS2 by using Just Enough Administration (JEA). What should you do before you can implement JEA? A. #160; #160; #160; Install Microsoft .NET Framework 4.6.2 on FS2. B. #160; #160; #160; Install Microsoft .NET Framework 4.6.2 on FS1. C. #160; #160; #160; Install Windows Management Framework 5.0 on FS2.

D. #160; #160; #160; Upgrade DC1 to Windows Server 2016. Answer: D QUESTION 8 Your network contains an Active Directory domain named contoso.com. You are deploying Microsoft Advanced Threat Analytics (ATA). You create a user named User1. You need to configure the user account of User1 as a Honeytoken account. Which information must you use to configure the Honeytoken account? A. #160; #160; #160; the SAM account name of User1 B. #160; #160; #160; the Globally Unique Identifier (GUID) of User1 C. #160; #160; #160; the SID of User1 D. #160; #160; #160; the UPN of User1 Answer: B

QUESTION 9 Your network contains two single-domain Active Directory forests named contoso.com and contosoadmin.com. Contosoadmin.com contains all of the user accounts used to manage the servers in contoso.com. You need to recommend a workstation solution that provides the highest level of protection from vulnerabilities and attacks. What should you include in the recommendation? A. #160; #160; #160; Provide a Privileged Access Workstation (PAW) for each user account in both forests. Join each PAW to the contoso.com domain. B. #160; #160; #160; Provide a Pnvilleged Access Workstation (PAW) for each user in the contoso.com forest. Join each PAW to the contoso.com domain. C. #160; #160; #160; Provide a Pnvilleged Access Workstation (PAW) for each administrator. Join each PAW to the contoso.com domain. D. #160; #160; #160; Provide a Pnvilleged Access Workstation (PAW) for each administrator. Join each PAW to the contosoadmin.com domain. Answer: B

QUESTION 10 Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario b repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. Start of repeated scenario Your network contains an Active Directory domain named contoso.com. The functional level of the forest and the domain is Windows Server 2008 R2. The domain contains the servers configured as shown m the following table. #160; All servers run Windows Server 2016. All client computers run Windows 10. You have an organizational unit (OU) named Marketing that contains the computers in the marketing department. You have an OU named Finance that contains the computers in the finance department. You have an OU named AppServers that contains application servers. A Group Policy object (GPO) named GP1 is linked to the Marketing OU. A GPO named GP2 is linked to the AppServers OU. You install Windows Defender on Nano1. End of repeated scenario You need to disable SMB 1.0 on Server2. What should you do? A. #160; #160; #160; From File Server Resource Manager, create a classification rule. B. #160; #160; #160; From the properties of each network adapter on Server2. modify the bindings. C. #160; #160; #160; From Windows PowerShell, run the Set -SmbClientConfiguration cmdlet. D. #160; #160; #160; From Server Manager, remove a Windows feature. Answer: C

Now we are one step ahead in providing updated real exam dumps for 70-744 We provide 100% 70-744 exam passing guarantee as we will provide you same questions of 70-744 exam with their answers. Our Microsoft 70-744 new questions are verified by experts. 70-744 new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDYUJLakwyekU4UEE> 2017 Microsoft 70-744 exam dumps (All 65 Q&As) from Lead2pass: <http://www.lead2pass.com/70-744.html> [100% Exam Pass Guaranteed!!!]
